# Wildlife in your Ward – Llanybydder

The Carmarthenshire Nature Partnership has produced this profile to highlight some of the wildlife, habitats, and important sites in your local area.

Carmarthenshire is justly celebrated for the variety within its natural environment, from the uplands in the north-east of the county to our magnificent coastline.

Every ward contributes to the rich and varied network of wildlife habitats that make up the county, whether that be woodlands, grasslands hedgerows, rivers or gardens. There are still gaps in our knowledge about Carmarthenshire's natural environment and the wildlife it supports. Despite having a wealth of data, some species and pockets of special habitats

remain unrecorded and unmapped. There is always more to find out.

Wildlife and our natural environment reflect local culture and past human activity. We see this in the field and hedgerow patterns in our agricultural landscapes, and in areas previously dominated by industry where, today, new habitats develop on abandoned land. And our farm, house and street names provide clues to the history of our natural environment.

The mosaic of habitats in Llanybydder make up an ecological network. If these habitats are well managed, are well connected and are sufficiently extensive, they will support a diversity of species and help to make a resilient natural environment.

A resilient natural environment supports wildlife and provides a range of ecosystem services, e.g. agricultural products, pollinators, timber, drinking water, regulation of floods and soil erosion, carbon storage and recreation and inspiration. Find out more at:

### Llanybydder Ward

Stretching from the Teifi Valley over to Mynydd Pencarreg and descending the slopes above the Marlais and the Tawe (tributaries of the Cothi), Llanfihangel ar Arth ward is a ward with a vast variety of biodiversity and landscapes. At this stage in its course the Teifi meanders through open valley pastoral landscapes. Llyn Pencarreg, almost hidden from view and close to the Teifi is a rare lowland example of a very nutrient-poor lake of glacial origin, formed when a huge mass of ice melted. Away from the Teifi Valley fields tend to become smaller and there is a greater mix of more agriculturally productive land together with species-rich and often marshy grasslands surrounded by mature hedgerows. Extensive areas of open windswept heathland, acid and marshy grassland dominate Mynydd Pencarreg together with and larger conifer plantations. Here, fields are larger, field boundaries less pronounced, the enclosure pattern is probably later and more rectilinear. In places it is marked out by mature beech and shelter belts. Running south from Mynydd Pencarreg number of streams have incised deep, steep-sided valleys, and these supports rich mosaic habitats of grassland, wetlands, scrub and woodlands where biodiversity thrives. Some of these habitats are nationally important.

### Special species in your ward

All the species in your ward are important in some way and help make your natural environment special. Some of the species recorded in Llanybydder are listed by Welsh Government as being of principal importance for biodiversity in Wales – so your area is important. Here are some species highlights from your ward.

Brook lamprey are jawless fish and the smallest UK lamprey species. After hatching they bury themselves with just their mouths at the surface, and then spend the next 5 years or so feeding on plant and animal debris which washes past. There are few records in the county – including your ward.

The lesser redpoll is a small finch of mixed woodland, birch scrub and wet woodland. It spends much of its time feeding on seeds and invertebrates in tall trees, especially birch, alder and larch. There is a lack of data on this species – can you help with records?

The nightjar is a scarce, though increasing, summer visitor, breeding in upland conifer plantations. An insect-eater, they spend their days camouflaged on the ground. At dusk the males start their odd churring song and wing clapping to attract the nearby females.

Eight orchid species are recorded in your ward. Orchids can be found from sunny meadows to the shade of woodlands. The rare butterfly orchids produce a strong scent at night, attracting night-flying moths that pollinate them. Orchids reach peak flowering season from May.

Although a small number populations remain in Carmarthenshire, wood bitter-vetch has suffered a severe decline over the past 30 years. It has been rarely seen since 2000. It prefers traditionally-managed, upland hay-meadow sites. It has been recorded in this ward – do you still have it?

#### How can you help?

If we want to protect the wildlife in Llanybydder, help from people who live here can make a real difference. There are many groups and individuals recording their local wildlife and managing areas for Nature in the county.

- There are 491 moth species recorded in your ward but only three species of fungi.
- Why not visit the Council's biodiversity web pages and the section on priority habitats and species in the county: <a href="https://bit.ly/3qsZqyP">https://bit.ly/3qsZqyP</a>
- ➡ Discover what is in your area take a closer look at what is around you let us know. It's amazing!
- ➡ Manage areas in your local school, village and gardens for wildlife make space for Nature.
- ☐ Get involved with a local conservation group volunteer some of your time for Nature.
- ⇒ For a range of ideas visit: <a href="https://bit.ly/2EENrZ6">https://bit.ly/2EENrZ6</a>

### Species records in this ward held by the West Wales Biodiversity Information Centre - Dec 2020

# Help record the species in your area

West Wales Biodiversity Information Centre (WWBIC) is a valuable source of information about the county's wildlife, and anyone can contribute. Common species are often under-recorded, so you don't need to be an expert.

WWBIC holds a lot of biological records for Llanybydder (see the map above) but there is one 1-km square with o records and eight with less than 10 species records. Can you help fill in the gaps?

Why not record the species that you see in your garden or when you are out and about? There are several ways you can record with WWBIC, by email, on the WWBIC website or using the LERC Wales App. More information can be found here: <a href="https://www.wwbic.org.uk/wildlife-recording/">https://www.wwbic.org.uk/wildlife-recording/</a>

There are many websites that can help with species identification. If you are on social media why not join West Wales Biological Recording (<a href="http://www.facebook.com/groups/westwalesbiorecording/">http://www.facebook.com/groups/westwalesbiorecording/</a>)

# Special sites in your area

This map highlights the special sites for wildlife in your ward and also places to walk in Llanybydder.

⇒ In Carmarthenshire we have a network of 'designated' sites, protected at a national or international level – these are the best examples of particular habitats in Carmarthenshire or even the UK and/or places where important species live. They are the cornerstones of conservation work, protecting the core of our natural heritage.

Want to find out more? Visit the Natural Resources Wales website - <a href="https://bit.ly/2YwEybo">https://bit.ly/2YwEybo</a>.

- NB. These protected sites do not necessarily have public access unless they have a Public Right of Way passing through them or are Open Access Land (see next page).
- ➤ Locally we also have nature reserves with important habitats and species which are managed by a range of organisations. Find out more at: <a href="https://bit.ly/2LcLJkM">https://bit.ly/2LcLJkM</a>

○ Open Access land', under the CRoW Act (2000), consists of open country (mountain, moor and heath land) and 'registered common land. It also includes areas of 'dedicated land' where owners, such as Natural Resources Wales, allow free access.. In these areas you can walk wherever you like, and in the NRW managed forests you can also ride a horse or a bike on the forest tracks, but please be considerate of other users.

Find out more at: <a href="https://bit.ly/3n2tahp">https://bit.ly/3n2tahp</a>

⇒ PROWs include Footpaths, Bridleways, Restricted Byways and Byways Open to All Traffic. There are over 2400 km of PROW across Carmarthenshire providing different levels of off road public access from walking to horse riding and cycling, each has its own unique character, you may already have your own favourite. Find out more at: <a href="https://bit.ly/2K7k9VK">https://bit.ly/2K7k9VK</a>

The maps in this profile are Ordnance Survey maps (OS) – they are a great way to help you find local Public Right of Way and Open Access Land either through paper maps or through their phone App. Find out more at: <a href="https://bit.ly/2Wi52Mo">https://bit.ly/2Wi52Mo</a>

The County also boasts numerous designated cycle paths, many of which make up part of the National Cycle network and Carmarthenshire's Active Travel network. There is over 100 km of designated cycle path in the county. Find out more at: <a href="https://bit.ly/3gQopVC">https://bit.ly/3gQopVC</a> and <a href="https://bit.ly/3gPcck8">https://bit.ly/3gQopVC</a> and <a href="https://bit.ly/3gPcck8">https://bit.ly/3gPcck8</a>.

➡ When you are out and about - always follow the Countryside Code: https://bit.ly/37hFjJS

### Local walks/sites to explore

You may already have your own favourite walk in your patch, where you experience the seasonal changes throughout the year. You may walk the same route regularly, but wildlife will not. So, keep your eyes peeled there is always something new to see/experience. But why not try walking another way? You might see something different but also the same sights – just in a different way.

Please tell us about your favourite walk or place to visit - here are some ideas.

#### General

- There are four local **Ramblers** groups in Carmarthenshire that explore the county. Find out more about the Ramblers' groups in Carmarthenshire: <a href="https://bit.ly/3r6xZZn">https://bit.ly/3r6xZZn</a>
- Walking Well Carmarthenshire is an initiative which aims to encourage people of all ages and abilities to take advantage of the physical, social and mental health benefits offered by walking in groups of like-minded people. It does this by setting up walking groups around the County. Find out more: <a href="https://bit.ly/2J48FCc">https://bit.ly/2J48FCc</a>
- The Discover Carmarthenshire website promotes local walk and cycle routes: <a href="https://bit.ly/3r35xYi">https://bit.ly/3r35xYi</a>
